

Notes

Congratulations and thank you for choosing to use **HHR FinancialPlan**.

HHR FinancialPlan makes it easy to create your financial plan. Please read the instructions and pay attention to the notes in the information windows and in the comment fields for the individual terms!

For the Standard Version only:

Your test period of 28 days starts as soon as you have entered a start date for your start-up project in cell C9 of the “Input sheet” worksheet. Please also remember to activate the “iterative calculation” in Excel if necessary (File -> Options -> Formulas -> Activate iterative calculation). This is done automatically in the PREMIUM version.

For the PREMIUM version only:

Before you start, you must allow macros. To do this, right-click on the file name in the directory/explorer and select “Properties”, then check the “Allow” box at the bottom right. Now you can use all the functions of **HHR FinancialPlan**. The 28-day trial period will then start when you first open **HHR FinancialPlan**.

We wish you every success with your financial planning!

Your Start-up-Assist HHR UG (hb),
Hamburg, Germany
